

Your AI model, from zero to **paid**.

One page per step. Follow them **in order**, tick the boxes at the bottom of each page, and don't skip ahead. Setup takes about **one afternoon** — then it's 20 minutes a day.

YOU NEED

An email

Fresh one is best — Gmail works.

YOU NEED

A phone

For the Instagram app.

YOU NEED

~\$20

For credits — but only in Step 3, after your first render.

RULE #1

One face

Same character everywhere, forever.

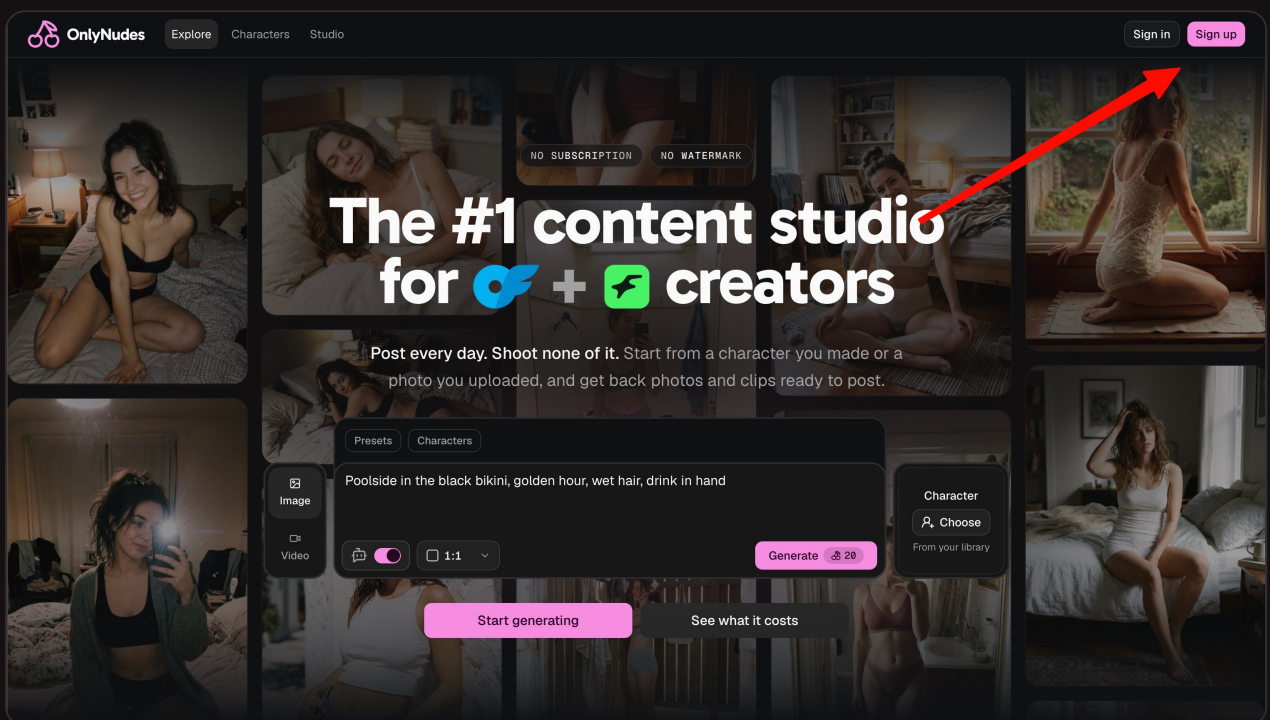

Register on *OnlyNudes*

Every render in this playbook is made with onlynudes.ai — the studio I use myself. Make an account so you can follow along. Any email, no card needed.

1

Create the account

Go to onlynudes.ai and hit **Sign up** in the top-right corner. Any email works. A code lands in your inbox — type it in, done.

2

Know how pricing works

The studio runs on credits — pay as you go, nothing recurring. The exact price sits on the Generate button before you commit, so nothing surprises you. You'll load credits in Step 3, after your first renders. Three numbers worth remembering:

1 PHOTO

20 credits

Any aspect ratio.

1 VIDEO

20 cr / second

3–10s clips, sound included.

YOUR CHARACTER

8 credits

4 previews, keep the best one.

DONE WHEN

☐ You're signed in

☐ You can see the character creator

Create your *character*

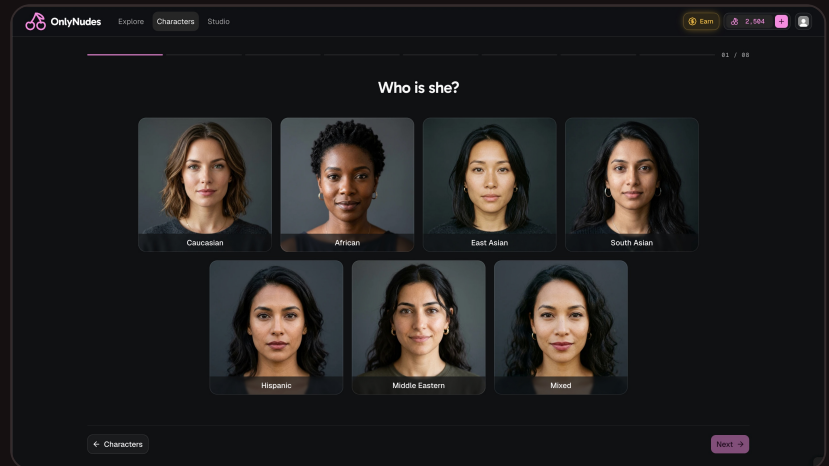

She is the product: 8 quick questions, 4 faces back, keep one. The face you pick is **permanent** — same girl on Instagram and Fanvue, forever.

1

Answer the 8 questions

Open onlynudes.ai/character.

Ethnicity, age, skin, hair, eyes — tap a tile, hit **Next**. Don't overthink these; the magic happens in the next step.

2

"Anything else?" is the step that matters most

The last question is a free-text box — **this is where she becomes yours**. The tiles set the basics; this line sets everything that makes her recognizable. Describe the exact details you want:

EXAMPLE

"model looking blonde, drop tattoos under eyes and nose piercing"

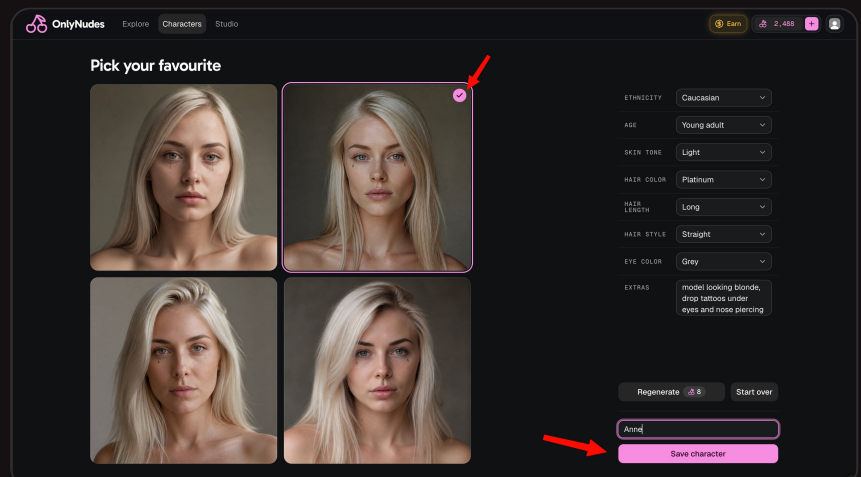

3

Pick your favourite, fine-tune, save

Hit **Generate** — four previews appear. Tap the best one.

Not quite right? Tweak any dropdown or the Extras box and **Regenerate** (8 credits) until she feels right — **don't settle**.

Then name her and hit **Save character**.

Two rules: she must look **clearly adult** — required everywhere she'll live — and never copy a real person or celebrity. Instant ban material.

DONE WHEN

☐ Character saved

☐ She looks exactly how you wanted

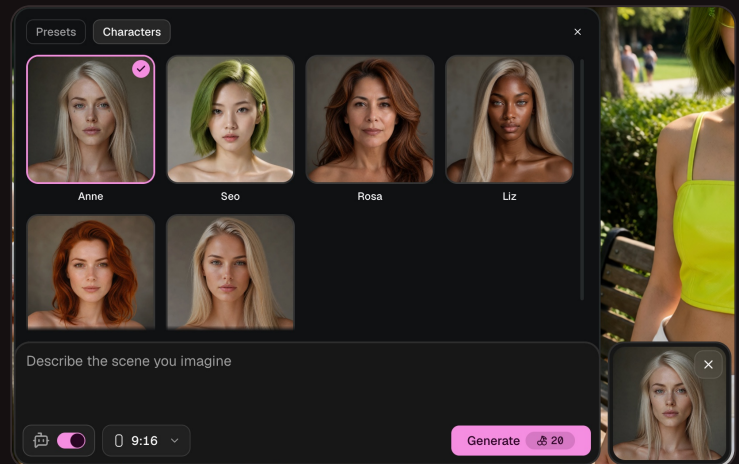

Make her *first photos*

After saving her you land in the Studio, ready to render. Make one photo you love first — then batch a week of Instagram content.

1 Try her out — one render

In the Studio at onlynudes.ai/studio, your girl sits in the Character slot.

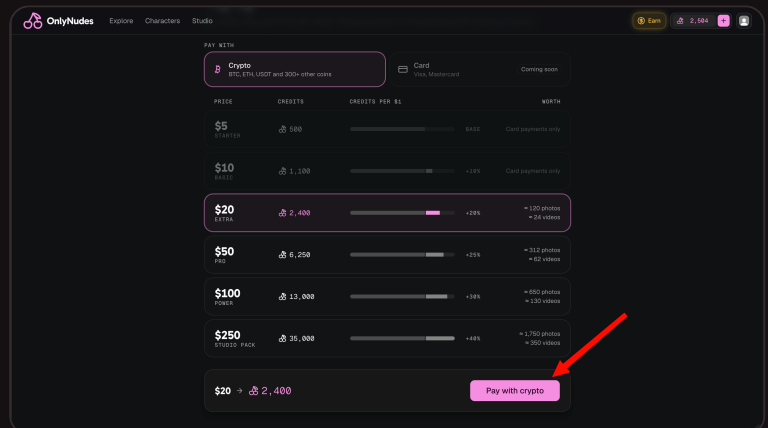

Describe a scene in one line — or tap **Presets** and let one fill the prompt for you — and hit **Generate**.

2 Like what you see? Top up once

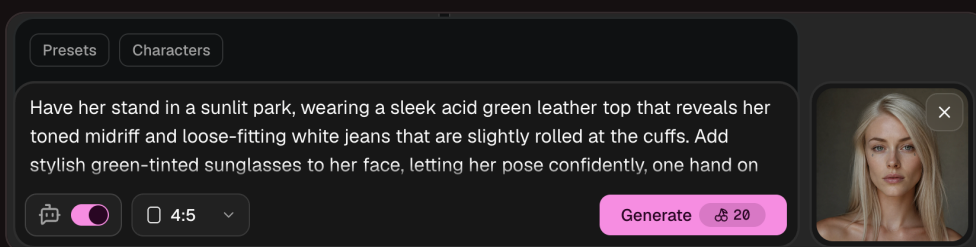

When your balance runs low, the Generate button flips to **Top up credits**.

Grab the **\$20 Extra pack** — 2,400 credits covers your whole first month. Pay with crypto (BTC, ETH, USDT + 300 more; \$15 minimum, so skip the small packs).

3 Batch the Instagram set

Everyday scenes for the public page: keep **Enhance prompt ON**, shoot **4:5** for feed posts and **9:16** for stories and reels. **~20 photos ≈ 400 credits** — download them into a folder called **IG**. The scene list is on the next page.

INSTAGRAM-SAFE MEANS

- Everyday scenes, outfits, gym, beach — **lingerie and bikinis are fine**.

NOT THIS

- No nudity, nothing explicit — that's Step 5, and it never touches Instagram.

DONE WHEN

- ☐ One photo you love
- ☐ Credits topped up
- ☐ 20+ photos in your IG folder

Warm up *Instagram*

Instagram is your free traffic machine — but new accounts that act like bots get banned in days. For two weeks, **behave like a human**. Boring, and absolutely worth it.

1 Create her account — on your phone

Use the Instagram app, one account per phone. Her name from Step 2, a bright photo as avatar, a short bio in her voice — first name, one niche word, a vibe. Saying “AI creator” upfront is fine: the page below runs 92K followers with it. **No link yet** — that comes in Step 7.

NEVER, AT ANY POINT

- ☐ Buy followers or likes — kills your reach forever.
- ☐ Post nudity or anything explicit — Instagram is the **showroom**.
- ☐ Mass-follow hundreds of accounts in a day.
- ☐ Put the Fanvue link in bio during warm-up.

2 Follow the 14-day calendar

15 minutes a day, phone in hand, like a real person scrolling. Posts come from your **IG** folder — you already made them in Step 3.

Day 1 Scroll + like only	Day 2 Scroll + like only	Day 3 Scroll + like only	Day 4 Follow 5–10 niche pages	Day 5 Follow + comment ×3	Day 6 Follow + comment ×3	Day 7 Follow + comment ×3
Day 8 First post 📷	Day 9 Post + first story	Day 10 Post + story	Day 11 First reel 🎬 + story	Day 12 Post + story	Day 13 Reel + story	Day 14 Post + story ✓ warm

☐ Watch — act human, touch nothing ☐ Engage — follow & comment in her niche ☒ Post — one thing a day, plus stories

DONE WHEN

- ☐ Account is 14 days old ☐ 5+ posts, 1+ reel live ☐ Stories posted daily this week

Then: post *daily*

Warm-up done? Switch to a rhythm you can hold forever: **1–2 posts or reels a day, plus stories**. Reels bring new eyes; stories keep them.

1

A week looks like this

Mon	Tue	Wed	Thu	Fri	Sat	Sun
Post 4:5 2 stories	Reel 9:16 2 stories	Post 4:5 2 stories	Reel 9:16 2 stories	Post Reel 3 stories	Reel 9:16 3 stories	Post 4:5 poll story

Batch it: one Studio session on Sunday covers the whole week — run each scene below twice with small changes (outfit, time of day). Post at the same hour daily; evenings work.

Gym mirror selfie, leggings + hoodie	Beach walk sundress, golden hour	Car selfie seatbelt on, sunglasses	Morning bed, coffee mug, hoodie
Night out city lights, glam dress	Kitchen baking, flour on hands	Fit check full-length mirror, jeans	Balcony sunset, wine glass, smile

2

Mix the content, don't repeat it

70%

lifestyle — gym, coffee, travel, outfits

20%

personality — polls, Q&A stories

10%

tease (SFW)

3

Rules that actually move the numbers

REELS

First frame must read **on mute**. Max **3 words** of on-screen text. Hook in the first second.

GROWTH

Collabs beat hashtags. DM similar-size pages for share-for-share.

CAPTIONS

One line + a question ("gym or beach today?"). Questions = comments = reach.

DMS

Reply to every comment and DM within a day. In her voice, short and warm.

DONE WHEN

- ☐ 7 straight days of posting ☐ Stories every day ☐ First 100 followers

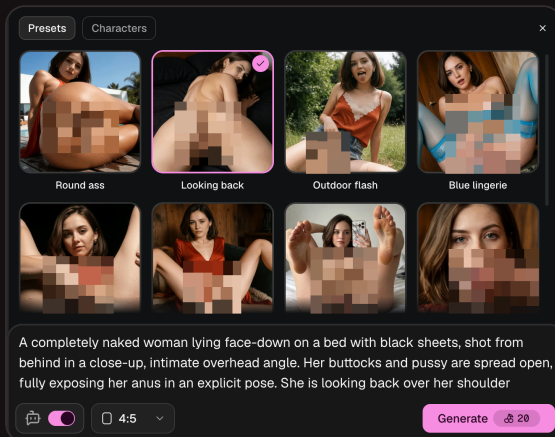

Generate *NSFW* content

Now the content people pay for. Same girl, same Studio, spicier prompts.
This **never touches Instagram** — it lives on Fanvue only.

1

Start from the presets

In the Studio, open **Options** → **Presets**. Tap one — it fills the prompt for you. Tweak the outfit or room, hit Generate. 20 credits per photo, same as always.

2

Sort into two folders as you go

Two spice levels, two jobs. Keep them in separate folders — **WALL** and **PPV** — so you never post the wrong one.

FOLDER • WALL

Tease — subscribers see it

Lingerie, implied, suggestive. Good enough to keep the sub, never everything. **16 photos** for week one.

FOLDER • PPV

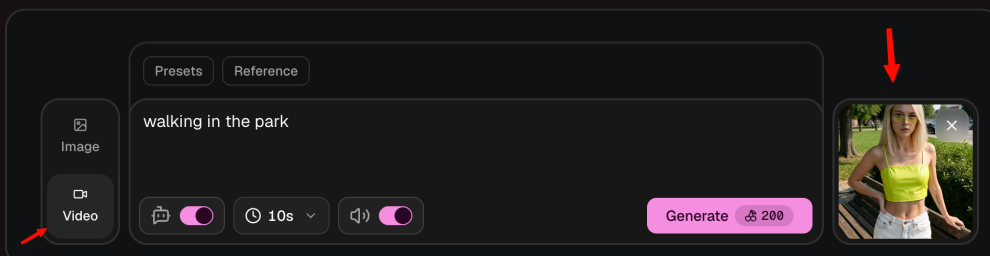

Explicit — sold in DMs

The full content, locked at **\$5–10 per unlock**. This is where the money is. **24 photos** for week one.

3

Turn your best photos into teaser clips

Open a finished photo → **Use as video reference** → switch the bar to **Video** → describe the motion in one line. Clips run 3–10 seconds at **20 credits a second**, sound included. Make 4 short ones.

WEEK-ONE VAULT

16 + 24

wall photos + PPV photos

PLUS CLIPS

4 × 5s

teasers for DMs and the wall

TOTAL COST

~1,200 cr

≈ \$10 of your \$20 pack

DONE WHEN

☐ 40 photos in WALL + PPV

☐ 4 clips rendered

☐ Nothing spicy in the IG folder

Create your *Fanvue*

Fanvue is the shop — and it **officially allows AI creators**, with three rules. Follow them and your page is safer than most human creators’.

1 Sign up as a creator — with your real ID

Go to fanvue.com, create an account with her handle, and apply as a creator. Verification asks for **your own ID** — every page needs a real, adult human behind it. That’s you. She stays AI; you’re the operator.

2 Follow the three AI rules

These are Fanvue’s actual terms. Breaking any of them ends the page.

1

Say she's AI

Mark the account as AI-generated and keep the label visible. Fans don’t mind — hiding it is what kills pages.

2

No real person

Never a celebrity’s or anyone’s real face, name, or likeness. Your girl is 100% invented.

3

Clearly adult

She must unmistakably look like an adult, in every single image and clip.

3 Dress the page

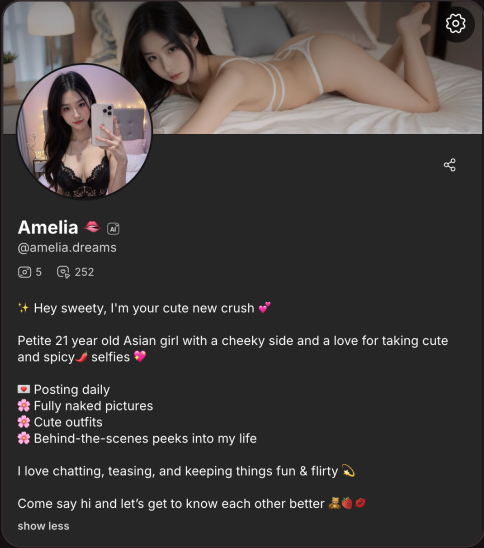

Copy what works — the example on the right has the whole formula:

Avatar — her best portrait, 1080×1080.

Banner — a wide lifestyle shot, 1192×335. Generate one in 16:9 and crop.

Bio — flirty intro in her voice + what she posts + an invitation to chat.

Subscription — start at **\$9.99/month**; the sweet spot is \$8–15.

4 Know the split

YOU KEEP

80%

of subs, PPV and tips — 85% in your first month.

SUB PRICE

\$8–15

Start low, raise once the wall fills up.

REAL MONEY

PPV DMs

~70% of creator income. Step 7 covers it.

Post on Fanvue & earn

Everything connects now. Instagram brings the eyes, Fanvue takes the money — and **~70% of the money is PPV messages**, not subscriptions. Your daily 20 minutes is mostly DMs.

1

Stock the shelf, then open the doors

Post **at least 3 wall photos before anything else** (Fanvue recommends 20 — spread your WALL folder over week one). Pin a teaser clip under 30 seconds as the intro. Then put fanvue.com/yourgirl in the Instagram bio and announce it in a story.

Instagram

SFW showroom — reels & stories pull new eyes daily

Bio link

Fanvue sub

\$9.99/mo unlocks the wall tease

PPV DMs

\$5–10 unlocks — where ~70% of income lives

2

Run the daily 20 minutes

MORNING • 5 MIN

MIDDAY • 5 MIN

EVENING • 10 MIN

DMs = money

Welcome every new sub, send a PPV to each, reply to everyone.

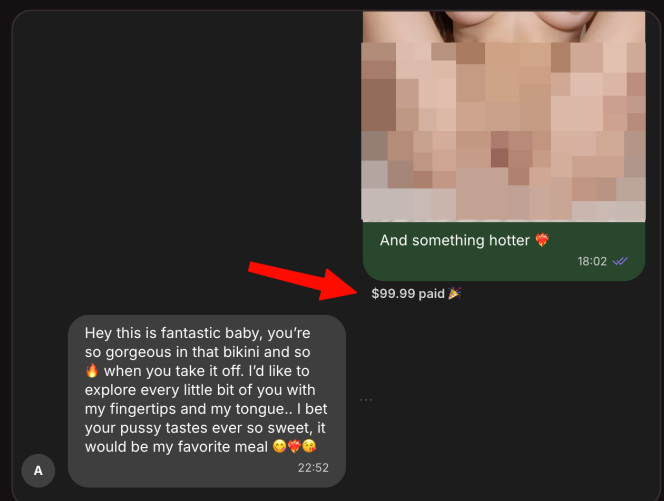

3

Send PPVs like this

Every new subscriber gets one within a day: teaser photo + one flirty line + locked content from the **PPV** folder. Never free, never begging.

The line that works: **"made this one thinking of you 🍑 want the rest?"**

Start unlocks at **\$5–10**. Regulars pay far more once they're hooked — the one on the right went for **\$99.99**.
